Congratulations to Mackenzie Reith-Snare, Australian Under 17 Softball Representative. Mac received notification of his call up to the Australian team Wednesday morning. Mac has worked consistently hard towards his goal of representative sport. “The hard work and training has paid off” he proudly stated when talking to the PDHPE staff. Mac will go into camp with the green and gold and contest a tournament later in the year against New Zealand, America and other teams yet to be announced. Mac is a fine example of an all-round successful student athlete, maximising his potential by working hard, being organised whilst displaying a professional and encouraging attitude. He is an excellent role model for other students and the image of the philosophy behind the Canobolas High Performance Athletes Program. Mac is pictured with Owner Director of PhyzX Justin Johnson who oversees his personally prescribed school based injury risk management training program. Mac is proud to say that he got through 2015 injury free in his sports thanks to his support from PhyzX and the CHPA.
Dear Parents and Members of our School Community

Welcome to Week 4. We have had a productive two weeks at The Canobolas Rural Technology High School. Our Year 7 students have settled into school well and we have begun to set the expectations for the year ahead. Since our last newsletter our school and students have been involved in a range of activities and programs. TAFE has started for many of our Stage 5 and Stage 6 students. I am determined to continue ensuring we have the highest expectations of our students across all aspects of school life and I will seek your support to ensure that this occurs. Our students are the reason our dedicated staff come to work each day and choose to be part of the most rewarding career we can have. As parents, it is essential that you become involved in your child’s learning and be an active participant in school based activities.

Last week saw the first P&C meeting for 2016. There was a pleasing number of parents in attendance and I am hopeful that we can continue to grow our P&C. This committee is a very important way of gaining information about our school and the path we wish to take with our students learning. The next meeting will be held on 2nd March at 6.30pm. If you would like to be a part of the P&C and learn more about our school please contact Keryn Percival on ikpercival@bigpond.com

Canobolas High Performance Athletes Camp

A huge congratulations to Mr Skein, Miss Morrissey, Jade Warrender and Norm Moore for the work that you achieved with our CHPA camp last week. I was delighted to be able to speak with our high performance squad on Thursday last week and to hear about the amazing programs which were run over the three days. We are looking forward to providing you with more information about the CHPA over the coming weeks.

Big Picture Launch

Thankyou to our many parents, community members and staff for attending the official launch of our Big Picture Learning Design on Wednesday evening. Our students were wonderful and have really engaged in this innovative program. I would publicly like to thank Ms Viv White, CEO and founder of Big Picture Education Australia for her commitment to our school and for her attendance along with Mike and Geraldine Roche from the Sally Foundation, a philanthropic foundation supporting our Big Picture Learning Design. If you would like more information about the possibility of your child enrolling in Big Picture in 2017, please make an appointment to see Mrs Rose or Ms Penberthy.

School Photos

Our school photo day was held on Thursday this week. It was great to see so many students looking extremely well presented for their photos. We will keep you informed of progress of the photos, however they should be delivered before the end of term.
Homework Centre and Senior Study Afternoon

Our senior study afternoons will commence next week and will continue each Thursday between 3.30pm and 5.00pm in the school library. All senior students are invited to come along and access our staff who will support students through assessments, homework, study skill advice and more.

Our homework centre will begin operating on Tuesdays beginning next week from 3.30pm – 5.00pm The homework centre will also operate from the Big Picture building and will focus on supporting students with homework or any upcoming assessment tasks.

Primary School Road shows

I would like to thank our partner primary schools (Bowen, Bletchington, Orange East, Glenroi and Orange Public School) for their support during our recent Road shows. These days were a huge success and I am sure that if you have children attending these schools in Years 5 or 6 they would have spoken about our school’s wonderful programs. If you would like more information about our school please don’t hesitate to call myself or one of my senior executive staff.

Use of Bikes and Scooters

This year we have seen a dramatic increase in the number of students riding bikes or scooters to school. It is fantastic to see so many students engaging in physical activity and the school has built a storage facility for this equipment. Students MUST use the cage at the side of A Block in order to secure their equipment. If students are not willing to comply with these instructions, they will not be permitted to bring bikes, skateboards or scooters to school.

Year 10 Formal

I would like to reiterate that our school will not and does not approve of any end of year Formal celebrations for Year 10 students. All students are now required by legislation to be at school until the age of 17 or until they get a job or an apprenticeship. I have heard that some Year 10 students have started looking into ways that they can have a “Formal” at the end of the year. Our school will be actively deterring any event of this type and I would seek parental support to ensure that students in Year 10 understand that they graduate in Year 12 2018. I am more than happy to discuss any aspect of this decision with you if you wish. Please make a time with my administration staff by calling 63621677.

I trust that you have a great fortnight and I look forward to speaking with you again shortly.

With my warmest regards

Chad Bliss
Principal
Year 9 are doing some pretty hair raising research into static and dynamic electricity using the Van De Graaf generator.

Year 11 physics had a great time modelling the transfer of energy in waves using some very tasty particles. They were so captivated by the waves they produced that they came back in their own time to look at what happens when the wave changes medium.

Year 8 are learning all about the organs and tissues of the human body – they’ve been really getting into the ‘guts’ of the digestive system.
This month in the Science display case we have been celebrating the birthdays of two very different people:

Mary Leakey (6 February 1913 - December 9 1996)

This lady was one of the world’s most famous hunters of early human fossils. One of her greatest discoveries was in 1978 when she uncovered a trail of 3.6-million-year-old footprints in Tanzania. This is the first known evidence of a creature that walked upright on two feet – though it looks like the feet were pretty different to the ones we walk about on!

Jules Verne (8 February 1828 – 24 March 1905)

Jules Verne was a French novelist whose writings laid much of the foundation of modern science fiction. The books that grew from Verne’s love of both science and literature inspired generations of scientists, inventors, and explorers. He imagined and wrote about many important inventions, conveniences and explorations we experience today, long before their time. He predicted the use of hydrogen as an energy source as well as future technologies such as submarines, aeroplanes, helicopters, skyscrapers and retro rockets. He also wrote about ways of travelling to and exploring the north and south poles as well as the moon. His story “The Time Machine” was written in 1895 and was largely responsible for popularizing the idea of time travel.
Year 9 iSTEM – Reliable data

9iSTEM have been investigating what makes data reliable when conducting engineering tests. Students designed and tested a bridge from one A4 sheet of paper. But was one test enough to produce a reliable result? Probably not! To produce some reliable results, students reproduced their bridge and tested them ten times, recorded the results and averaged them to determine a reliable result for the capacity of the bridge design.

Year 8 STEM – Biodomes

8STEM classes have been learning about the use of the biodomes to grow food for eating in places where that food may not normally grow. Students modelled a potential biodome frame structure from marshmallows and pasta. Then they estimated the surface area of a triangle and the whole structure. Then, using the formula for the surface area of a triangle, students calculated the actual surface area of their structures and compared them to their estimates. This simulated the process of working out how much clear plastic sheet would be needed to enclose their biodomes.

Year 7 STEM – Water pollution

7 STEM experienced the Murray River story, a yarn about how rivers can become polluted from the everyday actions of humans within river catchment areas. Students added different simulated pollutants to water to replicate what may happen to the Murray River. This understanding will help students with designing their prototype water cleaners in coming weeks.
**New Electronic Library**

An exciting new era has begun for our library which is now known as the explorer space located within the STEM centre. Students will be able to borrow and read books from an extensive online collection, from within your internet browser or app on all popular mobile devices.

**How do I get access?** Students can drop into the STEM Centre and see the friendly staff for their log in details. All Years 7s will visit the explorer space and be introduced to the ePlatform over the coming weeks.

---

**STEM Transition at Bletchington Public School**

This year we have introduced a weekly STEM workshop with Year 5 and 6 classes at Bletchington PS, one of our partner primary schools. 6N have been modelling the new Orange Regional Museum. This week they learned how to code an Intel Galileo microcomputer, that will control a flashing LED lightshow. Students identified a flashing school zone street sign as an example of how a coded computer like this could be used in the world around them. Great work!

---

*Mr Scott*
*Head Teacher STEM*
PDHPE Praccies

The PDHPE Faculty would like to welcome Norm Moore and Amanda Jewel to the faculty for a total of 5 weeks. They are both completing their Prac Placements from Charles Sturt University; here’s a little something from them.

“Hi I’m Norm Moore I am completing my first practical placement working with Miss Christie-Johnson. I have been enjoying my time at the school, being involved with the CHPA camp and swimming carnival has shown me how dedicated and enthusiastic the students at Canobolas are. I’m looking forward to the next few weeks working with the staff and students.”

“Hello, I’m Amanda Jewell and I am currently in my last year at Charles Sturt University and I am completing my third practical placement working with Miss Ashlea Bruton in the PDHPE department and Mrs Hutchinson in the HSIE department. I have thoroughly enjoyed my first week getting to know all the students and have quickly realised how talented and enthusiastic the students are at Canobolas High. I am looking forward to learning as much from the students as I hope they will from me.”

Slip, Slop, Slap and Swim

On Tuesday February 16th, Canobolas High School held the second Competitors Only swimming carnival at the Orange Aquatic Centre. With over 85 students attending the carnival, we achieved a higher participation rate than in previous years. There were some amazing dress-ups and costumes on the day; everything from flippers to hula skirts to cross dressing from Callan Naden and a kids size 7 crocodile onsie on Emily Melnik. Over the day we had some amazing performances, with records broken in every swimming event from the 50m freestyle to the 200m Individual Medley. Four students showed their commitment with competing in every event on the day, with Dyson Percival, Courtney-Rose Munday, Jayden Zegzula and Lochie Baker competing in all 8 races.

It was a successful day of sunshine and swimming, with lots of fun had by all our enthusiastic participants. Congratulations to all students who attended on the day – Canobolas had some fine representatives present on the day. Special thank you’s must go out to Mrs Pankhurst, Miss Bruton, Mrs Nash, Miss CJ, and Mr Skein, who ran a seemless carnival. The day would not have been possible without the assistance of Amanda Jewell and Norm Moore (CSU prac students), and Keryn Percival and Lisa Morrison who assisted with time keeping for the day. Congratulations to all students who attended the carnival—you were fantastic representatives of your school and we commend you on your conduct throughout the day.
Congratulations to all students who were awarded house champions of the 2016 Canobolas High School Swimming Carnival. Furthermore, congratulations to the following students who have qualified to compete at the Western Region Swimming Carnival at Dubbo Aquatic Centre on the 3rd of March: Dyson Percival, Erin Naden, Courtney-Rose Munday, Lachie Baker and Luke Wilde.

Year 12, 2016
Final Swimming Carnival
CHPA conducted their second annual testing and induction camp at Charles Sturt University in Bathurst last week. 38 students took part in 3 days of physiological, injury risk and fitness testing. They also participated in Believe Boot Camp and had a fun afternoon at Bathurst Laser Skirmish. They were assisted by staff from the CSU School of Exercise Science, Sport and Health and physiotherapists and exercise physiologists from PhyzX.

The group will now have prescribed exercise training programs and weekly strength and conditioning, fitness and Pilates classes. Along with workshops learning about organisational strategies, nutrition consultations and recovery strategies.

Some brief information about our continuing athletes we have learnt that since last year:

Average Counter movement jump height is 7.1cm higher

Average agility times are 1.5s quicker

Average Vertical Jump height is 8.5cm higher

Males: Overall most males wanted muscle growth.
Taking into consideration they are all in the 13-17 age group all are still growing.
Testing in May and then retesting in Nov, 6 month period.
10 male athletes were retested.
Total: 28.1kg increase in lean body mass (muscle, bone mass, blood volume)
Term 1 Western School Sport Team Trial Dates

If students are interested in trialling for Western Region Sports Teams this term please see the PDHPE staff for more details. Please note that these are parents would be expected to transport their child to the majority of these trials if they choose to attend. The details of the up and coming trials are below.

PDHPE Assessment Reminders

Many of the PDHPE classes across the years are currently working on assessable items both in class and at home. I reminder that if your child does not complete an assessment task and handed it on time for marking it will affect the overall grade they are awarded for PDHPE. This grade also has a practical effort, attitude and participation mark for lessons where students participate in practical games, sports and various physical activities. Please note that this component of the course is compulsory and students may only be excused from these classes with a medical note during the time of injury recovery.

Golf

Have you played golf?? Do you have golf sticks and wish to learn more about golf?? This is your chance. Not only can you elect golf for sport this year you can also participate in a fun golf competition and meet other students keen to learn about golf in the Western Region. Last year Trent Hassan contested the Western Region Golf Championships at Wentworth Golf Club. This year the championships have moved to Cowra and Canobolas is keen to be involved.

IF YOU HAVE GOLF CLUBS AND HAVE PLAYED SOME GOLF…THIS IS FOR YOU!!!

If any other Canobolas students are keen to be involved in the golf competition they can contact Mr Skein at school to get more information.

Notes are available now!!!!

Come along and have a great day…you might even win a prize!

WRAS Western Region Academy of Sport

Congratulations to our students Harrison Betts and Jack Connors who have been named in the 2016 WRAS squads of Basketball and Athletics. All the best with your training and games this coming year.
ATTENDANCE AT SCHOOL

You may be aware that from January 2010 the NSW Government legislated an increase in the school leaving age for students from 15 years to 17 years. This means that if your child is not 17 and is not in full time work or other tertiary study, they MUST attend school. Our school will be working closely with Mr Lyndon Marriott (Careers Adviser) and our Deputy Principals to ensure that we are able to cater for the needs of all students.

The Government and the Department of Education and Communities have also recently reviewed a number of child protection initiatives. Attendance at school was one of these. If your child is absent for any reason, it is essential that you contact the school and provide notification of the child’s absence in writing on the first day your child returns. Our school will take very seriously unexplained absences. If students are genuinely ill or have some other genuine reason for not being able to attend school, then the school will support you at all times. However, it is the parents/caregivers responsibility to ensure that their children attend school everyday.

A YEAR 11 PARENT INFORMATION EVENING

will be held in the STEM Centre on Thursday 3rd March at
Online registrations for the 2016 Netball Winter Competition will open on Monday 15/2 at 3pm, links and registration information will be posted to our Facebook page and Website.

Trials for Selected sides are on being held Saturday 27/2/2016 at the PCYC Netball Courts, details are available on our Facebook page and Website.

WESTERN REGION
SUMMER VOLUNTEER
SPORTING SPIRIT AWARD

The Western Regional Summer Volunteer Sporting Spirit Award is an opportunity to recognise volunteers who are the lifeblood of grassroots sport in country NSW. Sporting club and association members are invited to nominate individual volunteer(s) or youth (25 years and under) who would be deserving of such an award.

To be eligible for the Summer Award the nominee must have been a volunteer with the club or association during the period from November 2015 to March 2016. Rules of entry apply.

Nominations must be lodged by Friday 1 April 2016.

To nominate your volunteer, tell us in 150 words or less why your nominee is the most deserving volunteer. This might include the:
• Time they dedicate to the club, association or committee
• Positive attitude they demonstrate while volunteering
• Positive role model to younger and other club members
• Expertise and knowledge they bring to volunteering
• Encouragement they give to others in the club, association or committee.

In October 2016, there will also be an opportunity to nominate someone for the Winter Volunteer Sporting Spirit Award (for those who have volunteer between April and October 2016).

Submit nomination online at sportandrecreation.nsw.gov.au/volunteeraward
