WESTERN REGION SOFTBALL CHAMPIONS

On Thursday 17th March, the Open Boys Softball team and umpire Georgia Kiel travelled to the Westend Sporting Complex, Mudgee to compete in the Western Region Softball Knockout.

We played Blayney and Mudgee High to make it into the grand final match. The final was a repeat of the 2015 championship against our local rivals – Orange High. It was the sharp pitching and catching, tidy fielding and solid batting which brought us the team win to secure the match and become the 2016 Western Region Softball Champions. Along with the teams success we had six boys and Georgia selected in the Western Team which will compete in Orange later on in the year. Big congratulations goes to Aiden Kelly, Mac Reith-Snare, Max Pearce, Harry Pearce, Luke Wilde and Trent Wilde on their selection and Georgia Kiel as a Western umpire for the championship. A huge thank you needs to go to our Supercoach Geoff Kelly and Superscorer Justene Priest for coming out to Mudgee for the day to help and support the team.

The Open Boys team now eagerly await to compete at the NSWCHS softball state titles in August at Newcastle this year. Well done Canobolas!!
Dear Parents and Members of our School Community

We are nearly at the end of a very productive and busy first term, but the pace is certainly not slowing. To finish off the Term the following activities and events are occurring:

**Parent Teacher Interview Evening**

Parent and Teacher interviews are being held on Wednesday 6th April for Years 7 through to 12. The interviews will be held as usual in our School Hall. Interviews will run from 3:45 till 5:30pm. I would encourage all parents and carers to attend this afternoon to speak with your child’s teachers. Year 12 parents will be able to speak with their child’s teachers about their half yearly examinations. An information slip outlining these details will be coming home with your child this week and if parents and carers could return the response slip that would be helpful.

**Year 11 Start Senior School Sizzling Day**

On Thursday 31st March all Year 11 students have been engaged in a program to assist them to cope with the demands of senior study and equip them with the essential skills to maximise their potential. Under the leadership of Ms Ashley Bunworth, a team of staff delivered sessions to Year 11 students on goal setting, organisation, essay writing, relaxation, work and school balance and career planning. We hope this will help our Year 11 students and remind students and parents that staff can be contacted at any time for assistance regarding these matters.

**Parent Line**

Recently Parent Line NSW has contacted the school asking us to publicize their services. They are a group of professional parenting counsellors and psychologists who specialise in working on complex family issues such as promoting positive parent-child relationships, parent separation and its impact on children, answering parent concerns on child development and assistance with referring parents to specialist services. They can be contactable through telephone 1300130052, email using: info@parentline.org.au and web site at: www.parentline.org.au

**Athletics Carnival**

A reminder that our Athletics Carnival will be held on the last day of term, Friday 8th April. I would encourage all students to attend, participate and cheer on their friends and fellow House members. Students are encouraged to wear their House colours on the day.
This term we have witnessed an incredible and successful start to the STEM program. You may have seen the media coverage our program has received through ABC radio and WIN TV Central West. This term we have been announced as a NSW STEM Action School. Over 50 NSW state schools applied to be a part of this program and only 8 were selected, Canobolas being the only one west of the Blue Mountains. As a STEM Action School we will be providing coaching to other schools in STEM education. Visit our Facebook page if you missed the media coverage.

Recently we won a funding grant to continue our one day a week STEM transition project with Bletchington Public school and expand it to include Orange East Public School. This funding will allow staff of these three schools to collaborate on developing STEM skills from Years 5 to 8.

In the STEM Centre, Year 7 and 8 classes have been thinking, exploring and making their way through the first ever STEM classes at Canobolas. Students have been applying what they have learned in Science and Mathematics to projects including water filters and biodomes. Our first ever Year 9 iSTEM elective class has been working on a unit around Engineering Fundamentals, developing a range of skills to use throughout the year by completing mini-design challenges. Keep an eye out for student work on our schools Facebook page.

Relay for Life

This weekend students and staff from our school will participate in the Orange Relay for Life at Waratah Sports Ground from 1.30pm Saturday to 10am Sunday. The relay raises vital funds for the Cancer Council’s research, prevention and support services. A Crazy Hair Day at school on Friday also raised funds for this worthy cause.

Staff Development Day

Parents are reminded that the first day back for students in Term 2 is Wednesday 27th April. Tuesday 26th is a Staff Development Day where The Canobolas Rural Technology High School will host 750 teachers from around the region to become more proficient in using Technology Apps in the classroom.

It has been my pleasure to relieve as Principal while Mr Chad Bliss has been working out of the school. I would like to wish all our students and their families a happy and safe school holiday and encourage our students to meet at the usual gathering place and time to join the school’s ANZAC Day march contingent.

With my warmest regards,

Stuart Riles
Relieving Principal
Year 9 are currently studying chemistry with Mr Rodwell and learning how fuels combust – making rockets is a good way to put their knowledge into practice!

First the fuselage …

….next some wings...

Then off to the launch pad...

... and maybe a nose cone...

... to light them up and watch them fly!!!
Year 7 are currently conducting a filtration practical with Mrs Nealon as part of their Chemical World in-class assessment.

Folding filter paper was part of the fun ...

In separating the dirty water sample ...

... to give us cleaner water, suitable for animals to drink.

Mr Boardman has been working with Year 11 Physics to explore electrical circuits ... a subject apparently both intriguing and fun!
Year 10 English Study of Australian Identity through Film

This term Year 10 have been studying Australian Identity through the film Crocodile Dundee. Students have explored how Australia is represented in films created by other countries. The pictures are two submitted assessment tasks and are a visual collage of the film.
We remain strongly committed to providing pathways to further education for our indigenous students through traineeships and apprenticeships. In 2016 we are supporting our second group of Aboriginal students enrolled in the Aboriginal Education Support Teaching Traineeships. Maddison O’Neill, Brianne Wise and Kyiesha Dixon are completing a Certificate II in Education Support, at the same time as completing their Years 11 and 12 studies. This qualification allows them to gain employment in the education sector and gives them credit towards a teaching degree should they wish to continue to University. In 2016 our students spend one day each week at Orange East and Bletchington, two of Orange’s local primary schools, and will study education support at TAFE as part of their HSC studies. Pictured are the three girls with Mr Lyndon Marriott, Careers Teacher, Canobolas Rural Technology High School.
On Friday 18th of March ten Canobolas High School students and Mr Skein went to the Red Cross Blood Bank to donate blood. This was a joint initiative between senior PDHPE and Community and Family Studies classes.

We had to complete an enrolment form and receive a donor number before going. On arrival we were given a cup of Gatorade to ensure our electrolytes were high and also some pretzels. We completed more paperwork and had an interview with a nurse regarding our questionnaires. During this interview blood was taken from our finger to test the haemoglobin content and determine if it was at a level suffice to donate.

From the interview most people were taken into the donation area where we were seated, blood pressure taken and then a large needle inserted into the vein in our arm. There were 2 unlucky (or lucky) students who had to look on through the window after not being eligible on the day. For most it takes about 6-9 minutes to fill a donation bag of 470ml of blood. Some were below 5 minutes and were in and out of the chair quickly. Those that felt a little unwell stayed seated for longer to recover!!

The best part about it was at the end when we had a large milkshake or drink, cookie, chocolate or cheese and biscuits. As a group we made a ‘Whole Blood’ donation of 4.23 litres of blood that is approximately 1/2 a bucket full of whole blood! Whole Blood - What is it? Blood collected straight from a donor, without anything taken out. After it's donated, they usually separate whole blood into red blood cells, plasma and platelets in the labs.

Who can donate? You need to be 16-70 years old, weigh 50kg or more and be fit and healthy.

Our blood may be used for: Cancer, blood diseases, haemophilia, anaemia, heart disease, stomach disease, kidney disease, childbirth, operations, blood loss, trauma, burns.

Red cells can be stored for 42 days, so somewhere out there someone is healthier as a result of the efforts of the wonderful group of Canobolas High School PDHPE and CAFS students.

The director at the Red Cross Blood bank told us that we were the most well mannered and mature group of young people that she had come across and that we were a credit to our school. If you are interested in donating in the future we will be making another booking next term. Watch out for the details in the coming weeks.

- One in three Australians will need blood or blood products in their lifetime
- One in 30 Australians gives blood each year (3%)
- One blood donation can save up to three lives
- Australia needs more than 25,000 donations every week
- Demand for blood and blood products will grow by 100% over the next 10 years

Congratulations to our newly qualified Soccer Referees

On Saturday 19th and Sunday 20th March, our Canobolas aspiring soccer referees successfully completed the third and final component of their Level 4 soccer referee qualification with Football NSW.

For the final component, our students were required to complete a practical assessment where they refereed a range of games at the Proctor Park challenge as centre and line referees. The Proctor Park Challenge is a pre-season tournament for Girls 12/13/15/17 age categories. This tournament is staged by Western NSW Football & Football NSW on behalf of the Bathurst District Soccer Association and held annually.

At the successful completion of this practical assessment, these students are now fully qualified and registered as a Football Federation Australia (FFA) Level 4 referee and can now begin to referee soccer games in local and school competitions after their registrations are complete.

Big thanks goes to Rob Nieuwenhuis from Football NSW for conducting the course for our students over the past six months. We were notified post the practical assessment that due to the quality of our students refereeing the games, they will receive payment for the games they refereed. This recognition is true credit to our students who were professional and represented the school so well.

Big congratulations to these students, well done Canobolas!
On Wednesday 30 March, some of our students assisted as officials at the Orange Small Schools Athletics Championships at Waratahs sports ground. The students officiated at discus, shot put, long jump, marshalling and measuring and many other tasks as required. The feedback from parents, teachers and the organisers was that our students were of the highest quality and most professional in carrying out their duties. There will be more opportunities to help out at athletics carnivals and sporting events throughout the year. Congratulations Sally Beasley, Kattie-Lee Bennett, Torren Burton, Jack McGinley, Dyson Percival, Kyle Walker, Brooke Kingston and Emily Wright who all volunteered their services for the day. Fine representatives of Canobolas High School.
Canobolas Open Boys Hockey

On Monday 21 March, our Open Boys Hockey team contested the Western School Sports knockout competition. The boys drew a tough line up of hockey players from Orange High in the Round 1 game.

In minor round games Canobolas defeated Kelso and then Bathurst High School. We had three students trial for the Western team and Trent Wilde was successful in being selected as an umpire for the boys Western team to contest the State Championships at Pennant Hills next term. A great day out for our Open Boys hockey players who displayed great sportsmanship and effort right throughout the day. Thank you to the boys who also allowed a student from Cowra and from Oberon to run off our bench to trial for the Western team for the day. Well Done Canobolas!
On Wednesday 23rd March, the 9/10s Boys touch team travelled to Bathurst to participate in the 9/10s All Schools Western Touch Carnival. In total the boys played six games throughout the day in some very warm weather. Canobolas started the day with wins against Kandos High School (2-1) and Oberon High School (6-1). The boys then came up against Orange High and after two slow starts in their previous games, the boys played some fantastic touch from the start. Unfortunately the boys let the game slip away eventually going down 6-3. Due to the limited number of teams in the competition, we had to play those three teams again, with the team with the most wins coming out on top. The next three games were where the boys really played as a team and showed the opposition what they were capable of, beating Kandos High 7-2 and Oberon High 9-0. The final game of the day was against Orange High, the boys played outstanding touch with the game ending in a 2 all draw. This placed us second overall. The boys were excellent representative of Canobolas High School and were a pleasure to take away.

Congratulations to Erin Naden, Callan Naden and Lachlan Griffith, who have been selected to represent Western in touch football at the CHS under 15s carnival in Mudgee on the 30th April-1st May. We wish them all the best.
9/10 Touch Football

On Wednesday 23rd March the Years 9/10 Boys and Girls Touch Football teams travelled to Bathurst to participate in the NSW All Schools Regional Championships.

The girls first game was up against Oberon High School. It didn’t take the girls long to prove they were too fast and skillful for Oberon. Ayla Frost scored the first try of the day after a beautiful pass from Sarah Smith. Our second try came from Jada Murphy taking the ball to the line, committing the defenders and offloading to Grace Khattar. Oberon High managed to make the score a little tight, taking the score 2-1. Erin Naden soon took the girls to a convincing victory after using her exclusive footwork and scored two awesome tries. This took the final score to 4-1 in favour of Canobolas.

In the second game we played Kandos High School. The game was very close and scoreless for most of the game. Kandos High School managed to score after Caitlin White passed a nice ball to help the opposition run the length of the field. Kandos then scored again on the siren taking the final score to 2-0.

By the third game we faced Orange High School, who were the leaders of the competition. The girls struggled to keep up with the speed of the game and Orange High put 3 quick tries on them. However, it started to look good for Canobolas, when Connie-Lea Beletic intercepted a pass and was out in clear space. She was a sure thing for a try….. But then her little feet were going too quick for the rest of her body and she came tumbling down. Orange High scored another 2 tries, but they couldn’t keep us scoreless, with Erin Naden using her speed and agility to score taking the final score to 6-1.

The girls last game was in the 3rd v 4th final against Oberon High School again. The girls played a fantastic game. They were all communicating and working together as a team. Jada Murphy managed to cross the line after Brianna Priest scooted and quickly offloaded. Grace Khattar showed her rapid pace out wide and blew away the defence to score our second try. This was soon followed by Jada Murphy crossing for a double when she fooled the defence with her dummy. Then Erin Naden scored the final try after wrapping Tekara Jackson, and zoomed off sealing the deal with a 4-0 victory.

A massive thank you to Nailani Lang and Jeremy Boulton for coming along and refereeing on the day. All the students need to be commended on their behaviour and sportsmanship displayed throughout the tournament.
Canobolas High School
Athletics Carnival

When:  **Friday, April 8th (Week 11), 2016**

Where:  **School grounds**

Dress up in your house colours and get as many participation points as you can to win.
ATHLETICS CARNIVAL 8th April

On Thursday April 8 Canobolas will host our annual Athletics Carnival. Nominations will be taken up until the middle of week 10 for events, but students are able to enter on the day if they find they wish to compete in extra events. Students who would like a program of their events can collect one on the day. If your son/daughter wishes to pre-enter, an entry form is attached below and can be returned to PDHPE ASAP. A program for the day is also below.

Canobolas Athletics Carnival 2016

Event Nomination Form

## Please Tick or Circle the events you wish to enter.

Track Events

- ☐ 100m
- ☐ 200m
- ☐ 400m
- ☐ 800m

Field Events

- ☐ Long Jump
- ☐ Shot Put
- ☐ Discus
- ☐ High Jump
- ☐ Javelin

Relays will be organised on the day with the fastest 100m runners in each age group required to run for their house. Sports house captains leading their teams into the carnival are:

**PDHPE Assessment Reminders**

Many of the PDHPE classes across the years are currently working on assessable items both in class and at home. I remind that if your child does not complete an assessment task and hand it on time for marking, it will affect the overall grade they are awarded for PDHPE. This grade also has a practical effort, attitude and participation mark for lessons where students participate in practical games, sports and various physical activities. Please note that this component of the course is compulsory and students may only be excused from these classes with a medical note during the time of injury recovery.

At CRTHS we get our notes and money for excursions and activities in on time to make it easier for our coaches and office staff!

Mark Skein
Head Teacher PDHPE
This fortnight in STEM!

STEM Action School

Did you know we are one of 8 STEM Action Schools in NSW? As a result of the STEM learning programs we have in place, Canobolas was chosen as a NSW STEM Action School from almost 60 applications. This means our school will be coaching other schools on how to start an effective learning STEM program.

STEM Transition with Bletchington Public – Robotics masterclass

Over the last two weeks, students identified with a talent and interest in Science and Technology were selected from the Bletchington Year 6 STEM Transition classes for a robotics master class at the Canobolas STEM Centre.

Students worked with our Lego EV3 sets to build and program a robot. These robots used an ultrasonic sensor to detect an oncoming robot, and run away from it! This was based on the ‘fight or flight’ instinct some animals have.
Year 7 STEM – Water cleaners

7STEM classes have been working on ways to clean water in times of natural emergencies, and the role water has on living things. Students have experimented with filtration methods that can be implemented into a design for a portable water cleaner that could be used to help animals survive.

Year 8 STEM – Biodomes

8STEM classes have been learning about the use of biodomes to grow food for eating in places where that food may not normally grow. Students used the makerspace to prototype a biodome based on their earlier prototypes. Testing has begun to see how long a lettuce seedling can be sustained artificially!

Year 9 iSTEM – Engineering Fundamental

As part of the Engineering Fundamentals unit, 9ISTEM have been experimenting with solar and battery circuits using our STELR energy resources. This has given the students a chance to learn how to use a multimeter and explore voltage usage in components.

Mr Scott
Head Teacher STEM
STEM Action Schools

The NSW Department of Education has established eight STEM Action Schools in line with the NSW Department of Education STEM Strategic Plan. The STEM Action Schools will share and support effective STEM pedagogy, illustrate innovative practice for student engagement in STEM, and demonstrate successful leadership, professional learning and industry partnerships.

Through an expression of interest process the eight schools were identified:

- Cronulla High School
- East Hills Girls Technology High School
- Hastings Secondary College
- Macarthur Girls High School
- Maitland Grossmann High School
- Narara Valley High School
- Riverside Girls High School
- The Canobolas Rural Technology High School

STEM Action schools:

- Exhibit exemplary teaching and learning of STEM subjects and/or integrated curriculum
- Have a clearly articulated STEM vision that can inform practice and future initiatives
- Model good practice to inform future Department initiatives
- Mentor and provide professional development to other schools
- Demonstrate implementation of flexible, effective or new approaches to student engagement and/or student pathway planning
- Display high quality resources and skills, and professional learning programs
- Build effective partnerships with local councils, businesses, universities and industry
- Provide advice to other schools on aspects of being a STEM Action School, including implementation, structural organisation and financial management.
- Mentor final year pre-service teachers and early career teachers of science, technology and mathematics
- Share and disseminate all aspects of being a STEM Action School.

Each of the selected schools has staff with individual strengths and particular expertise. A goal of this program is to facilitate these accomplished and experienced staff to lead a community of practice in the teaching of STEM across NSW.
The Canobolas Rural Technology High School

**STEM @ Canobolas**

- is a 21st Century curriculum that involves teaching Science, Technology, Engineering and Mathematics holistically in project-based activities.
- uses an interdisciplinary and applied approach to learning and aims to engage students and give clearer meaning and purpose to science and mathematical skills and knowledge.
- Involves a real-world problem solving approach where students apply their knowledge and skills through project-based engineering challenges.

**Our motto: Students Thinking, Exploring and Making**

By developing these STEM skills we aim: to nurture a passion for learning, make our students candidates of choice for future employment; provide them with an asset in tertiary study. An innovative STEM strategy has been implemented that features a school-designed STEM course for all Stage 4 students and the NSW BOSTES board endorsed iSTEM elective for Stage 5 students. We are one of the only schools in NSW to offer STEM education embedded into curriculum.

**Our innovate STEM curriculum model**

- Stage 4 students study two ten week integrated STEM units each school year (four units by the end of Year 8).
- Content of each unit aligns with the topics being studied in mainstream Science classes, allowing students to apply their scientific knowledge to real world applications.
- Content and skills from Mathematics is embedded within the project work in the STEM units to give authentic learning experiences.

**Our Facility**

STEM classes are delivered in our innovative STEM Centre. This repurposed library is a result of a design thinking process to determine the best way to use the space for 21st Century learning activities. It features:

- The thinkerspace: A flexible space for collaborative learning and designing using critical thinking.
- The explorerspace: A knowledge area featuring traditional books and an eLibrary accessed on class sets of iPads.
- The makerspace: A practical space for crafting prototypes with traditional tools and advanced manufacturing using computer aided design and rapid prototyping tools like 3D printers.
Year 12 Visual Design students have been working on skate decks during Term 1. Using a mix of acrylic paints and stencilling, students have created decks that reflect their personal interests. Incorporated into the designs are the personal brand logos the students designed earlier in the term.
Here are some interesting pictures of Yr 10 & 11 Photo digital Media work. They are a play on traditional holiday snaps, but using hotwheels cars and books as backgrounds.
SCHOOL NOTICES

FILM Pond CHANNEL
We are very excited to announce that Canobolas High now has its own “Filmpond channel”, which is like YouTube for schools.

Less than 1% of Department of Education School have been selected to have their own Channel to showcase the benefits of using online video to share and promote school programs.
CanobolasRTHS.filmpond.com

Currently there are 2 films about CHPA and STEM and we have more in the making.

LOST PROPERTY
There are a number of school hoodies and polar fleeces in our lost property box. See Mrs Richard in the STEM if you need to search for lost articles of clothing. Coming in to the winter months it is a good idea to clearly label all items of your child’s school uniform as replacement can be costly.

SCHOOL PHOTOS
The school photos have arrived and will be handed out to students. If parents ticked the box to pick them up, please come to the Front Office and collect them.

ORANGE SHOW
Saturday 16th and Sunday 17th APRIL

Autumn school holidays at the Orange City Library

For this coming school holidays the library will have six stations of activities around the theme of - Planes, trains and automobiles.

Children of any age are welcome to design their dream vehicle, build cars and planes in origami, spend some mindful time colouring in, play a Wii-U race game, try our quiz or the I Spy display.

Activity stations will be available all day every day during the holidays at Orange City Library. No need to book.
